## Press Release

Berlin, May 2019

### Keep on Rocking! The New Marlon 8Stool Rocking Stool

The Marlon 8Stool's unique features are its octagonal shape and especially its new rocking function. The tipping angle is moderate and goes in one direction: to the front. The light rocking action makes sitting on it easy, flexible, and relaxing. It is important to note that the seating position on the stool always remains safe and stable!

Thanks to the low weight and the handle the Marlon 8Stool is very mobile and versatile and can be used in various environments in the home or in offices and hospitality areas like lounges, receptions, meeting rooms, rest areas, etc.

The surface in oak veneer is available in various finishes like natural or colored stains. The seat with the handle is made of woolen felt. Custom colors for the corpus and felt are available upon request.

We craft the Marlon 8Stool by hand in Germany with meticulous attention to every detail. Measures: width x depth 37 x 42 cm (14.5 x 16.5 in.); seat height 41 cm (16.1in.); seat size 30 x 30 cm (11.8 11.8 in.).

Design Marlon 8Stool: Alexander Rehn.
